PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	The goal of this work was to investigate the antibacterial and antifungal potential of the essential oils extracted from R. *officinalis and P. citrosum* against Gram-positive bacteria (*Staphylococcus aureus, Bacillus subtilis*) and Gram-negative bacteria (*Pseudomonus aeruginosa, Escherichia coli*) and fungus (*Candida albicans*). Scientifically robust and technically sound work, important results were obtained but with insufficient description of important the experimental part, especially part **Antimicrobial assay**. The definition of the concentration of used EO should be described as well more exactly. For more details see yellowed notes directly in the manuscript.	
Minor REVISION comments	I have no additional minor comments.	
Optional/General comments	Simply and classically well written manuscript has an objective discrepancy – see above. I recommend the manuscript in this form for publication but only after small but important revision.	

PART 2:

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Are there ethical issues in this manuscript?	*(If yes, Kindly please write down the ethical issues here in details)*
