SDI Review Form 1.6

Journal Name:	International Research Journal of Pure and Applied Chemistry
Manuscript Number:	Ms_IRJPAC_48773
Title of the Manuscript:	Sustainable bio-adsorbent for treatment ofNitrate, Fluoride and TDS in groundwater
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that <u>NO</u> manuscript should be rejected only on the basis of '<u>lack of Novelty'</u>, provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed highlight that part in the manu his/her feedback here)
Compulsory REVISION comments	 INTRODUCTION: The introduction needs to be rewritten such that it captures the justification for carrying out the research, is there any regional or Global significance of the research? All this needs to be stated. Please mentioned precise research objectives in bullet format for the clarity of the readers. Most of the references are old, especially in the introduction; without removing existing literatures effort should be made to cite more recent works. 	
	 DISCUSSION 1. Authors should not be limited to only their work, but they can also refer to others recent studies carried out in other parts of the world which are actually supporting their findings. 2. Further research on this subject, regarding adverse impacts of these compounds detected in the affected area. 3. Be innovative with your discussion, share some new ideas. 4. Authors should make recommendations with regards to observed findings in the study, and give some insight to future directions 	
	BIBLIOGRAPHY/REFERENCES Please follow the journal guidelines, and arrange reference alphabetically	
Minor REVISION comments		
Optional/Generalcomments	The paper discusses Sustainable bio-adsorbent for treatment of Nitrate, Fluoride and TDS in groundwater. It is a good topic and great efforts has been put to monitor water quality, However some minor corrections has to be made to improve the quality of the paper.	

ed with reviewer, correct the manuscript and nuscript. It is mandatory that authors should write

PART 2:

	Reviewer's comment	Author's comment (if agreed wi that part in the manuscript. It is n feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	

As per the guideline of editorial office we have followed VANCOUVER reference style for our paper.
