

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Advances in Microbiology
Manuscript Number:	Ms_JAMB_44978
Title of the Manuscript:	Effect of Charcoal Filters Integrated with Moringa Oleifera Seed Extracts on Microbial Population in Water from Unprotected Sources of Kapseret Division, Kenya
Type of Article:	

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Most of the raised issues have been corrected. However, the study map provided is of poor quality and does not indicate the exact spots where samples were collected. Since authors did not take GPS of each sampling points that would have given a clearer picture of each sample location, in my opinion, I will advise authors to provide two maps on a single page: 1. map of east Africa showing the location of Kenya, then extrapolate from Kenya to show the map of the country indicating the location of the five sampling locations. However, if this is not available, authors can just remove all the study maps from the work; already, the explanation they have given under study area is sufficient.</p>
