PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	• Abstract is too vague and short. The authors need to develop it a little bit. • The structure of the manuscript makes no sense at all. Introduction should be right after Abstract. Methods are not clear enough. • The authors focused mainly in psychosocial risk factors (emotions, feelings) for suicide, neglecting many other important risk factors such as psychiatric diagnosis, personality disorders, cognitive deficit, familial antecedents, migrant status, childhood traumatic events, genetics, serotonin CSF levels, access to lethal weapons, etc… • There are very few references. The author keep citing one single paper (King et al, 2012) and fail to cover a minimum of scholar / academic bibliography regarding suicidality. • The article should be re-written.	
Minor REVISION comments	Manuscript pages should be numbered.	
Optional/General comments	Very poor manuscript.	

PART 2:

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Are there ethical issues in this manuscript?	*(If yes, Kindly please write down the ethical issues here in details)*	

As per the guideline of editorial office we have followed VANCOUVER reference style for our paper.
