SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	<ol style="list-style-type: none"> 1) It is very important for the authors to point out clearly and with appropriate references that preventable prenatal factors, such as maternal obesity (maternal diabetes also, maternal high fat consumption) are associated with fetal brain inflammation and possible ASD symptoms of the offspring. 2) Gut microbiota may affect brain development and subsequent behaviour. Mode of delivery affects the gut microbiota of the offspring. Which is the relationship between C-section and ASDs? 3) Antibiotics alter gut microbiota. Is the use of antibiotics during pregnancy or early in postnatal life potential risk factors for ASDs? Which is the contribution of antibiotics in the cow milk? 4) Which is the possible role of prebiotics in ASD management? (given that prebiotics do not have the survival problem in the gastrointestinal tract that probiotics do). 	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
