**PART 1: Review Comments**

|                                     | Reviewer's comment  | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|---|---|
| <b>Compulsory</b> REVISION comments | The article aims to review the technological applications in skin cancer prevention. Originality counts in favor of the article, as I failed to find in databases other studies that evaluated technological application with skin cancer prevention. However, in my opinion all sessions of the article need to be restructured because they are very short and the authors should expand the discussion using more references and relating the different topics. In patterns of disease and injury session, the patterns of injury need to be described in a specific and specific way and the graph utilized should be properly referenced in the text. In summary, to become a review the manuscript needs to broaden the discussion between the applicability of technological advances and their relation to the skin cancer prevention otherwise it is characterized as a mini review. |   |
| <b>Minor</b> REVISION comments      |   |   |
| <b>Optional/General</b> comments    |   |   |

**PART 2:**

|  | Reviewer's comment  | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
