PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The title must be clear and help to cash the main idea of the study. My suggestion is: Influence of storage time/duration on the toxicity of <i>Moringa olifera</i> (Family) oil to <i>Tetranychus urticae</i> (Family)</p> <p>Corrections are indicated directly in the article.</p> <p>It would be useful to talk about the main chemical components of the oil in paragraph 3 of the introduction.</p> <p>Paragraph 2 of the RESULTS AND DISCUSSION must explain the result but not express the surprise. It may be useful to indicate if this kind of result is already observed elsewhere with some products, even a synthetic chemical.</p> <p>According to the chemical composition of the oil; can one think about any kind of a chemical reaction that could induce the toxicity difference between the fresh oil and that is 120 days old?</p>	
Minor REVISION comments		
Optional/General comments	The article can be accepted if the comments are taken into account.	

PART 2:
