PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The data was not be updated (1980 – 2012). Research on economic policies needs newest data to assure the meaning of conclusion and forecast 's results.	
Minor REVISION comments	The number of observations is not enough to use Vector Autoregressive Model. As my experience, if you want to apply VAR to quantify the effectiveness of Monetary Policy in a country, you need at least 50 observations. Hence, you should update data by quarterly.	
Optional/General comments
