

**SDI Review Form 1.6**

Journal Name:	<a href="#">Journal of Engineering Research and Reports</a>
Manuscript Number:	Ms_JERR_49601
Title of the Manuscript:	Behaviour of Isolated Footings Reinforced Randomly by Glass Fiber
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	1. The mixes should be given, in order to let reader understand better, because there is a relationship between concrete strength and fibre ratio. 2. How to ensure uniform pressure force of the bottom according to Fig. 9 and Fig. 10 ? because the crack formation maybe caused by uneven loading. 3. The upper limit values of the two empirical formulas should be given, because there is a maximum fibre ratio in concrete.	
<b>Optional/General</b> comments		

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	

**Reviewer Details:**

Name:	<b>Jianhui Yang</b>
Department, University & Country	<b>School of Civil Engineering, Henan Polytechnic University, P. R. China</b>
