SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>This is a good topic and could help the planning and agriculture departments to focus on specific results/ suggestions, instead of extending support to age old nonviable cropping pattern.</p> <p>Unfortunately, the authors have failed in properly projecting the study's importance. The presentation is full of mistakes and typographic errors. I took considerable time in enhancing the study's importance.</p> <p>The authors have to bring into focus the ill effects of chemical fertilizers and pesticides and suggest alternate inputs that are nontoxic and affordable. Even though it may not come under main objective, it is essential to spell out apt technology to lessen degradation of soils and usage of area and crop specific irrigation techniques to lessen misuse of water.</p> <p>Figure captions need to be included for every figure. Figure numbers are wrongly repeated and source of every figure should be given in the caption to avoid strain to readers.</p> <p>Red colour corrections need to be retained. Blue colour suggestions should be made use of in making figures fully useful.</p>	
Minor REVISION comments	All the corrections are to be inserted properly.	
Optional/General comments	Manuscript in the final form should include figures and tables at correct places in the main frame of the text.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
