Compulsory REVISION comments	<p>The study presented in Ms_JSRR_46939 is superficial with a little appreciable scientific validity. It is presented as a simple radiation intensity measurement report carried out at different distances from the issuing base station. Is the tool able to give scientifically reproducible measures?</p> <p>In addition, the study does not bring any relevant news on the emissions of mobile phone base stations.</p> <p>The authors speculate on the known effect produced by the irradiation of the increase in tissue temperature without bringing real data.</p> <p>There are many typos</p> <p>The bibliography can be integrated with more recent publications</p>
