PART 1: Review Comments

Evaluation of the roles of doctors and the functionality of the healthcare system in Nigeria I have read this manuscript and I consider it acceptable for publication if certain aspects are corrected. The topic is interesting, I congratulate the author(s) for their effect. I will suggest that the author(s) revisit the following issues in their work. The topic is to broad for research. Or the topic can be restructure to reflect the institution (Ben Carson Senior School of Medicine, Babcock University) where permission was obtained for the study, which may not reflect the may not reflect the surpline of Negerian doctors. I) By providing data from 100 respondents implies the study was researchable. How was the sample drawn? 2) Explain how a sample of 100 Doctors was obtained. At least 24 states in Nigeria and in each of the states, at least 22 local governments. Nigeria has 36 States and Abuja (Federal Capital) with 744 local governments. Where was the 100 sample draw from? How did the author(s) draw the sample? Where was the 100 sample draw from? U Surplian how a sample of 100 medical doctors for the study is grossly inadequate considering the largeness of Nigeria. I) I was graved to sample of 100 medical doctors for the study is grossly inadequate considering the largeness of Nigeria. If the Demographic data of respondents are necessary, showing various categories of doctors that participated in the study. Ethical comments Permission from the Ethics and Research Committee of the Ben Carson Senior School of Medicine, Baboock University is not sufficient. Was the study carried out in the said institution alone? If the study cut across Nigeria, permission should come from all the institutions that the sample was drawn (Primary, Secondary, Fertiary and private sector).		Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and
I have read this manuscript and I consider it acceptable for publication if certain aspects are corrected. The topic is interesting. I congratulate the author(s) for their effect. I will suggest that the author(s) revisit the following issues in their work. The consideration of the study is the following issues in their work. The consideration of the study is the following issues in their work. The consideration of the study is the following issues in their work. The consideration of the study is the study which may not reflect the opinion of Nigerian doctors. a) This is a Policy anticle and should begine descriptive approach. b) By providing data from 100 respondents implies the study was researchable. How was the sample of a top 100 Doctors was obtained. At least 24 states in Nigeria and in each of the states, at least 2 local governments. Nigeria has 36 States and Abuja (Federal Capital) with 744 local governments. Where was the 100 sample draw from? How did the authorisy draw the sample. (State – by – State)? Then the sample. c) Using a sample of 100 medical doctors for the study is grossly inadequate considering the largeness of Nigeria. d) To avoid impersonation doctors should have been contacted in their various places of work. e) The Demographic data of respondents are necessary, showing various categories of doctors that participated in the study. Ethical comments Permission from the Ethics and Research Committee of the Ben Carson Senior School of Medicine, Baboock University is not sufficient. Was the study carried out in the said Institution alon? If the study cut across hould come from all the Institutions that the sample was drawn (Primary, Secondary, Tertiary and private sector).			
are corrected. The topic is interesting, I congratulate the author(s) for their effect. I will suggest that the author(s) revisit the following issues in their work. The topic is too broad for research. Or the topic can be restructure to reflect the institution (Ben Carson Senior School of Medicine, Babcock University) where permission was obtained for the study, which may not reflect the opinion of Nigerian doctors. a) This is a Policy article and should be given descriptive approach. b) By providing data form 100 respondents implies the study was researchable. How was the sample drawn? c) Explain how a sample of 100 Doctors was obtained. At least 24 states in Nigeria and in each of the states, at least 2 local governments. Nigeria has 36 States and Abuja (Federal Capital) with 744 local governments. Nigeria has 36 States and Abuja (Federal Capital) with 744 local governments. Where was the 100 sample draw from? How did the author(s) draw the sample? What is the population of doctors in Nigeria (State — by — State)? Then the sample. c) Using a sample of 100 medical doctors for the study is grossly inadequate considering the largeness of Nigeria. d) To avoid impersonation doctors should have been contacted in their various places of work. e) The Demographic data of respondents are necessary, showing various categories of doctors that participated in the study.
