PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Buruli ulcer can be found in several areas of the world from Africa to Australia. Even in Europe might appear sporadically, and family practitioners are not really trained to recognize the disease. The appropriate diagnosis is established only after several attempts with conventional antibiotics and the suspicion is raised to some unusual infection, when the wound is slowly progressing, The treatment of advanced BU is difficult and long lasting. This manuscript is the detailed description of the isolates from different location of the country and calling the attention to the importance of the disease.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
