PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The author presented a well-thought article, which, nevertheless, leaves some questions. For example, the article lacks a justification for the choice of specific variables. Of course, it is intuitively clear that, for example, health is related to body condition, but it would be worth giving a concrete justification, at least at a descriptive level..	
Minor REVISION comments	It is also not clear why there are data on poverty in other African countries, since a comparative analysis was carried out for only three of them, and the rest are not even mentioned in the text.	
Optional/General comments	The author accepts another model of poverty and related formulas without any justification, which does not correspond to the scientific approach to the study of social phenomena. The article is interesting, but publish it sooner before solving these issues	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
