<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	Authors' carried out the analysis of low-polarity components of Polyporaceae Mushrooms as well as evaluated the antioxidant activity of these mushrooms. This work is correctly done however discussion is rather superficial. This work can be treated `as preliminary study so the sentence "...two fungi can also be used as raw materials for the production of anticancer and anti-inflamantory drugs"...is a little bit exaggerated.	
<b>Optional/General</b> comments
