FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The paper is not good yet. It needs some corrections.</p> <p>Citations and references are wrong. References should not be in alphabetical order but numbered according to the order in the manuscript. Ex. Lewis should be number 1 rather than number 5.</p> <p>The citation must be [1] and not (1).</p> <p>See reference style here http://www.sciencedomain.org/journal/58/authors-instruction or in same paper like this http://www.journalrepository.org/media/journals/MRJI_58/2018/Dec/Yusuf2562018MRJI43167.pdf</p> <p>Besides that, some reference is written in different size and font.</p> <p>Some words need correction: trates, antogeny, REFERENCES.</p> <p>It is necessary to standardize the size and form of writing the subtitles such as Introduction, Material and Results because each one is written in a way. I suggest you to see other articles published by the Journal.</p>
