

Editor's Comment:

After review the manuscript and Reviewer's comments I agree with the publication of this manuscript. The revisions asked by the reviewers were made by the authors. However, I have two points to interfere:

1) In the keywords, avoid same terms from title.

2) The results are interesting, but do not corresponding to the title, since a correlation test (statistic) was not made. Therefore, a correlation test should be included in the study, or the title should be changed.
