

**Editor's Comment:**

With reference to the manuscript entitled Crop growth and productivity of rainy maize-garden pea cropping sequence as influenced by Kappaphycus and Gracilaria saps at alluvial soil of West Bengal, India was reviewed.

The author has to make changes in the abstract as suggested by reviewer 2 (Joseph). He highlighted the abstract doesn't capture some of the important findings.

so the editor may be directed the author to incorporate changes in abstract and submit it back

Rest of the manuscript is ok; changes were made and may be accepted for publication.
