

**Editor's Comment:**

The manuscript "2019\_JAERI\_46977" describes the diallel analysis of sweet potato [*Ipomoea batatas* (L.) Lam] genotypes for combined beta carotene and dry matter content in Southern Guinea Savanna of Nigeria.

The corrections (improvements, reorganization of the text and adding references) which suggested by the reviewer Jin should be marked in different color by the authors.

I could not find the difference between first and revised version of the manuscript.

I prefer to ask to the authors the changes (in different color) which made in the text by the authors before the making my editorial decision.
