

Editor's Comment:

The study titled "THE ROLE OF HEMIC HYPOXIA IN THE DEVELOPMENT OF SENSORINEURAL HEARING LOSS IN CHILDREN ASSOCIATED WITH HEPATITIS B" is an original and interesting study when the current information is scanned.

-The language used in the study is simple and understandable.

-The method used is explained in detail in the material method section.

-The table contains explanatory information.

-In addition, the article has been revised in accordance with the comments of the reviewers.

Therefore, in my humble opinion it can be accepted for publication.
