

Editor's Comment:

I've given a check at the manuscript in subject. It seems that authors improved the original version, following referees' requests.

By the way, I could not find in a map (fig. 1? Fig. 3?) the trace of the section shown in Fig. 2.

In addition, section in Fig. 2 should be in agreement with the following geological sketch (fig. 3).

Still, in the map in fig. 3 the Legend is missing (what's the meaning of the different colours? Lithotypes/geological formations should be given).

After such minor revisions, the manuscript could be considered for publication.
