

Editor's Comment:

On the basis of Stage 4 and 5:

- Reviewer "Nag" highlighted several minor comments. The authors accomplished most of them except the last one "As mentioned, conclusion part is heart of research paper and hence author is suggested to improve to make this part more impressive to read".

Consequently, I am glad to say that the paper "Modal analysis and optimization of typical parts of 2K-V reducer" will be ready to be published after this minor revision.
