

Editor's Comment:

The manuscript number: 2019/MRJI/49953, entitled "Antimicrobial profile and Asymptomatic Urinary Tract Infections among Pregnant Women Attending Antenatal Clinic in Bolgatanga Regional Hospital, Ghana" is relevant, unpublished and dissemination of the results of this study will certainly contribute to the scientific community. However, few corrections should be conducted to further improve the quality of the paper presented. I suggest formatting the references. Some references the name of the journal is abbreviated and others are not.
