

Editor's Comment:

Taking into consideration the reviewers' comments, the revised manuscript as well as the authors' feedback, I recommend the paper to be accepted for publication after some improvements are conducted. More specifically, the authors should rework the abstract (not to exceed 300 words) as well as should conduct a language editing to correct some grammatical/spelling mistakes. I suggest also authors to eliminate the figures that nothing add to the manuscript as well as better discuss the results comparing them with those of previous studies in discussion section and properly rework the conclusion section, following the two reviewers' comments.
