

Editor's Comment:

My final decision can be published it. But there are too many errors in references section.

1. Why literatures are numbered.
2. Some of the literatures are written differently in the text (Apabol 1997 and Teteth 1997).
3. Author names are incorrect (Tindal, 1983, Tindall, 1983) Which one is correct?

Anyway, the references section and all literatures given in the text must be rewritten according to the author guide. However, they can be published after they are corrected.
