

Editor's Comment:

My verdict on this article is to publish when minor corrections are taken into consideration.

Minor corrections to be considered

- i- Improve uniformity on references e.g insert 'and' appropriately on reference number 11, 13 and 19
- ii- I prefer 'result tables' and 'plates' and shifted to 'Results and Discussion' section
- iii. For plate 1 and 3- what do the arrows indicate? Make sure these plates are self explanatory
