

Editor's Comment:

The manuscript can't be published in this form.

The manuscript should be modified more.

2.- Abstract. Too long 390 words.

3.- In tables count(percentage) should be in columns.

4.- The authors should remember that thesis is not the same as article.

5.- In Data analysis should be results

6.- With small sample size all data should be based in median and percentiles and non-parametric tests. The authors are using mean and standard deviation and the use non-parametric tests. They should standardize the presentation of data.

7.- I cannot find if the subjects signed the consent form.

Author's should modify the manuscript
