Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors did not respond clearly to my comments To comment No. 7 they did not respond, and at No. 8 they have mentioned half a sentence.	We believed we tried as much as possible to answer the reviewers question very well. Is it that we should not write the brief explanation of the result on top of the table; because, we know that is the standard? On 8, we explained to the reviewer why we choose to use alphabets, instead of symbols. Thanks
