

**SDI FINAL EVALUATION FORM 1.1**

**PART 1:**

Journal Name:	<a href="#">Advances in Research</a>
Manuscript Number:	Ms_AIR_45076
Title of the Manuscript:	Assessment of Sub chronic Toxicity of <i>Sonchus cornutus</i> in Rats
New Title of the Manuscript:	Assessment of <i>Sonchus cornutus</i> Toxicity in Rats
Type of Article:	Original Research Article

**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Most concerns raised have been addressed in the paper. However, I still find some replies not satisfactory:</p> <p>1)- Please, can the authors provide the voucher number? Without voucher number, some questions can be raised on authentication and accessibility to the plant species in the future by other researchers (please, refer to "THERESA M. C ULLEY, 2013. Why vouchers matter in botanical research. <i>Applications in Plant Sciences</i> 1 (11): 1300076)!</p> <p>2)- My concerns VI and VII regarding the micrographs (Fig. 1) have not been fully addressed, especially concerning the display of the fields with same type of structure: the portal space observed on the test group does not appear on the control group micrograph! What do the authors mean by "The control can be deleted"? The control is the group to make reference of while checking for any change in the test group!</p> <p>3)- Finally, just by the way, I do not think deleting the adjective "sub-chronic" from the title was a better idea, as it is now less informative!</p>	<p>I would like to acknowledge the Reviewer for his valuable comments. I have done all corrections.</p> <p>1). I have referred to Theresa M, 2013. The voucher number of the plant deposited in the herbarium was not mentioned. Only the vernacular name, description and distribution of the plant were documented in (Braun M et al. Asteraceae. Common Weeds of Central Sudan. 1991).</p> <p>2). O.K. corrections highlighted yellow.</p> <p>O.K. Correction highlighted yellow.</p>
