

SDI Review Form 1.6

Journal Name:	Asian Journal of Research in Animal and Veterinary Sciences
Manuscript Number:	Ms_AJRAVS_50095
Title of the Manuscript:	ISOLATION AND IDENTIFICATION OF MYCOTOXIGENIC ORGANISMS IN POULTRY FEED FROM SELECTED LOCATIONS IN ABIA STATE, NIGERIA
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>From the topic, this study is centred on isolating mycotoxigenic fungi. Do yeasts have the capacity to produce mycotoxins? Should they be included in this report? Authors should please see to this.</p> <p>Authors have not shown in this article that they verified via scientific experiments that isolates have the capacity to produce mycotoxins. Although most of the isolates have been reported to be mycotoxin producers, more credibility is given to the study when scientific experiment back up claims. This is not a seminar article but an original research paper.</p> <p>I recommend an adjustment to the topic, 'Myctoxigenic' may be inappropriate because the results include non mycotoxin producers and the mycotoxin producing capacity of the isolates were not tested in this study.</p>	<p>Okay, the title could better read as</p> <p>Isolation and identification of mycotoxigenic and related organisms in poultry feed from selected locations in Abia State Nigeria.</p> <p>OR</p> <p>:Isolation and identification of fungi organisms in poultry feed from selected locations in Abia State Nigeria</p> <p>NB: The research is not about toxins but organisms that are capable of producing toxins</p>
Minor REVISION comments		
Optional/General comments	The authors have done a fantastic job. Well done.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
