EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>1. The paper needs editing in all paper (e.g., the title, it should be a model instead of model)</p> <p>2. Abstract:</p> <p>The aim is not clear; it is to investigate or to compare? I think that it should be "This study aimed to investigate the effects of EAC and human hepatocellular carcinoma (HCC) on the liver in mice and human.</p> <p>3. Methodology: Group two served as an interventional or experimental group that inoculated once intraperitoneal with EAC cells.</p> <p>Group1 was collected from healthy male and group 2 patients infected with HCC. It is better to be "The control group was healthy males, while the experimental /interventional group was patients infected with HCC.</p> <p>4. Material and Methods:</p> <p>This is an experimental study, it is very necessary to have a study hypothesis. Thus add hypothesis.</p> <p>Determine the period of conducting the paper.</p> <p>5. Discussion</p> <p>Add recommendations and limitations if there were any limitations.</p> <p>Therefore, the authors are requested to do the mentioned modifications.</p>	<p>1: Thanks we made editing for our manuscript.</p> <p>2: we made the request in our revised manuscript.</p> <p>3: Thanks; we made the request in our revised manuscript.</p> <p>A total of 10 female Albino mice and 10 blood samples and liver biopsy from humans were used in this work; mice were divided into two equal groups, group 1, control mice; group 2, EAC; Group 3, control humans collected from healthy male and group 4, HCC include patients infected with HCC.</p> <p>4: we made the request in our revised manuscript.</p> <p>5: Thanks this good and correct; we added recommendations in the abstract and in the end of revised manuscript.</p>
