**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	<p><b>Key words:</b> According to GUIDELINE FOR AUTHORS (available in <a href="http://www.journalcjast.com/index.php/CJAST/about/submissions#authorGuidelines">http://www.journalcjast.com/index.php/CJAST/about/submissions#authorGuidelines</a>), should be given 4-8 key words. In the manuscript are 12, so it is necessary to reduce the number of them.</p> <p><b>Results:</b> You say that there was not a significant difference between treatments. What was the statistical test used to prove this? Why is there no significance in the tables presented? It is imperative to place the statistical significance in the tables.</p> <p>I strongly suggest that the GUIDELINE FOR AUTHORS be checked because some aspects are not in the rules, for example:</p> <ul style="list-style-type: none"> <li>- Number of key words;</li> <li>- A brief literature review in introduction (it is missing);</li> <li>- Conclusion (it is missing);</li> <li>- References topic (it is not Resources).</li> </ul>	Changes according to comments were made and highlighted
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments
