PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Nutritional composition and antioxidant capacity of four tomato varieties of <i>Lycopersicon esculentum</i> is clearly explained. Macronutrient composition analysis showed the presence of lipids, proteins, fibres and carbohydrates in the tested materials and also contains rich mineral composition. The anti oxidant activity assay compared with standard reference. This investigation showed that the four varieties of tomato possessed high antioxidant capacities. The overall work is well appreciated	
Minor REVISION comments	Authors are asked to include the pictures of the four tomato varieties in the experimental section (materials part).	The pictures of the four tomato varieties are included in the experimental section (material part)
Optional/General comments	-
