PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	It is an interesting study because it gives us a vision of the related aspects of the microbiota present in patients with HIV as well as the presence of the microbiota present in patients with retroviral treatment and drugs for prophylaxis.	Thank you
Minor REVISION comments	In materials and methods in section 2.2 Design of the study and participants indicates 160 participants and in point 2.3.2 processing of the samples indicates 213 participants. You must clarify the number of participants because it generates confusion. In point three he talks about results and discussion, but in point four only discusses. You must define if it is a section or are two, in addition to respecting the format of the journal	All the corrections have been done
Optional/General comments
