EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>1. <b>Include Results and Discussion within a single section</b></p> <p>2. <b>Describe in Data analysis (Material and Methods) the statistical test and tools used to analyze the dataset</b></p>	<p>We included Results and Discussion into a single section "3. RESULTS AND DISCUSSION". Accordingly, there is no section "4. DISCUSSION" in the manuscript.</p> <p>We added one more detail in the last paragraph of section 2.4. The final explanation for data analysis is: "The averages of triplicate determinations together with the standard deviation were presented in all tables and figures. Any significant differences among treatments were determined by ANOVA (Fisher test, P = .05) using Minitab software."</p>
