General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The figures must be ameliorated The text must be restructured and the repetitions suppressed	Under theoretical background , the statements were generalised, however, under Materials and method , the statements were based on the particular technique used. Therefore, there may be no need to harmonise the two as requested. The figures (specifically the base map) have been worked on and some of the repetitions thought about have also been reviewed.
Optional/General comments		In figure 3, where the question was asked what is this? It is a loop. This is because the investigation was not done in a particularly profile. The legend is clear when zoomed. Some visible corrections were coloured yellow.
