**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The authors obtain the solutions of the nonlinear hybrid electrical line which model different physical problems such as problems in the electrical domain and the propagation of dispersive water waves. They use the Bogning-Djeumen Tchaho-Kofane method properly. As a result, the solutions consist of some elementary functions. The paper is interesting and have some useful results. The subject of the manuscript is suitable with the aim and scope of the journal.	Thanks for the appreciation
