PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>In-text citations should be numbered in brackets and listed consecutively in the reference list</p> <p>It should be stated in the text that Padjadjaran University is in Indonesia</p> <p>The English language of the manuscript requires polishing, preferably by a native English speaker because some sentences are difficult to understand. For example "Tilapia is known as white flesh fish which is very resistant to environmental changes because it contains dense and thick meat that has the potential to become a source of raw materials for the processing industry that is managed" and "Freshwater pomfret has a savory and tasty meat taste, although there are enough thorns in the meat". The text also contains a number of spelling mistakes.</p> <p>For Section 3.3, which is the only part which contains any science within this manuscript, the authors state "Chemical tests conducted on Eomuk with different freshwater fish raw materials" but Table 4 only presents data for red tilapia! Where is the other data? Please present data for all 3 species. The following sections are very weak without comparative data.</p> <p>It is very difficult to understand what the authors mean by "Decision making on the value of the alternative weight". It appears to be some weighting system but the logic behind it is not properly explained.</p>	
Minor REVISION comments		
Optional/General comments
