

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Chemical Sciences
Manuscript Number:	Ms_AJOCS_49349
Title of the Manuscript:	Phytochemical Screening and Antimicrobial Activity of Kenyan mushroom Ganoderma lucidum
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Even though foam test found negative for all three crude extract as mentioned in table 1, authors have claimed that saponins are present in all three extracts under section 4.1 "Discussion for Phytochemical Results". This mistake hasn't been corrected despite I have commented on it during first revision. Please correct it and then I think manuscript is worth to publish.
