General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link: (<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The paper is very well written and data very well analysed, with adequate references.</p> <p>It needs a general review to correct typing mistakes. Instead of putting only the reference number I suggest to use a word like: authors, a reference, so that the text is not just cut by a number (but this is only a suggestion).</p> <p>In my point of view the author could at the conclusion end propose, based on his experience and field work, some general suggestions or actions that could be used to overcome the situation described and found during the research analysis.</p> <p>In the title and summary the name of the country – Nigeria, where the research was realized should be mentioned. To an international audience just the region name is not enough to locate the research area.</p>	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes. Kindly please write down the ethical issues here in details)</i>
