

**SDI Review Form 1.6**

Journal Name:	<a href="#">Asian Journal of Research in Zoology</a>
Manuscript Number:	Ms_AJRIZ_42267
Title of the Manuscript:	ABUNDANCE AND DIVERSITY OF BIRDS IN THE OGBESE FOREST RESERVE, EKITI STATE, NIGERIA.
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	I will like to suggest that if there are other studies on avifauna species diversities in the Ekiti state or Nigeria in general, the findings of this excellent study should be compared to them in the DISCUSSION section to make the study more richer. It would show the study's relatedness- similarities and differences with other similar avifauna species diversity in the region or country.	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	The cataloguing of the diversities in the avifauna species is of paramount importance in the field of biodiversity conservation. This is crucial for thorough ecosystem assessment programs and the drawing up of appropriate conservation strategies in the Ogbese Forest Reserve, Ekiti State, Nigeria. The methodology implemented is sound and robust. The discussions are interesting and scholarly. The conclusions and recommendations are valid and very applicable. It is worth publishing and very appropriate for this journal.
