

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Annual Research & Review in Biology
Manuscript Number:	Ms_ARRB_44435
Title of the Manuscript:	Phytochemical Screening of Root, Stem and Leave Extracts of Terminalia avicenoides
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<ol style="list-style-type: none"> 1. The work has improved a lot, but there are a lot of grammatical errors all over the manuscript: Example line 64, 69, 123, etc. Check there could be more mistakes. 2. I still suggest combining 2.1 and 2.2 to avoid repeating line 64 in 2.2 as you have done and or you talk about collection, identification ... of the plant in 2.1, while in 2.2 you talk about how the plant material(s) is or are prepared. 3. Line 69... the grey bark of what? 4. Explain within the text the reason for your choice of aqueous extract.
