PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<ul style="list-style-type: none"> - English should be improved. -The objectives of the study should not form a separate section; they should be placed at the end of the introduction. - The author did not perform a statistical analysis despite the fact that he continues to use the word "significant", I strongly recommend the completion of the statistical study. - The discussion is poor and the conclusion is much longer than the discussion: it is necessary for the different sections to be proportional to each other.
