

SDI Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_46376
Title of the Manuscript:	Studies on the effects of Fanta additives and simultaneous consumption of Fanta with ascorbic acid on histological parameters of male mice
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This research shows an enormous potential for clinical evaluation, with the investigation of a food product that is already in the market, with great possibility of bringing risks to human health. This approach is extremely important so that the scientific community can alert the responsible bodies so that food surveillance is increasingly rigid for our health. This work, therefore, has great relevance in the scientific community.	
Minor REVISION comments	It would be suggestive to cover more research data to complement the results. Even by the 3R's rule, it is important to get as much information from the animal model as possible. For this, I suggest an approach of biochemical, hematological and, if possible, hormonal (insulin, for example) dosages, since it is possible to observe the general metabolic status of the animals and to correlate well with the histopathological findings found in the study. Which, by the way, were quite interesting. It would also be desirable to revise the formatting rules of the article more carefully.	
Optional/General comments
