

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Research Journal of Pure and Applied Chemistry
Manuscript Number:	Ms_IRJPAC_49786
Title of the Manuscript:	HEALTH RISK ANALYSIS OF HEAVY METALS (Cr, Fe, Hg & Ni) IN EDIBLE VEGETABLES IN YALA URBAN AREA OF CROSS RIVER STATE, NIGERIA
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Still I am sorry but it is self-plagiarism. The text of both articles is in majority the same. If one compared the text of the manuscript with the one which has been published: http://www.journalsij.com/index.php/CSIJ/article/view/30105/56480 the text of paragraphs are the same. They just changed the numbers. The whole paper is just auto-plagiarism. The international standards do not allow the same text formulations and phases for two different manuscripts. I believe that a good science is more that a copy and paste the same text just with other numbers.</p> <p>The authors just passed and copied the text. This is not possible according to the international standards. In addition, the authors are quite impolite in the reply to the reviewer who have large exercise with publications in highly impacted international journals and is a regular reviewer of top international journals.</p> <p>Additionally: The authors did not explained still why they in descriptions of table have other metals than in the table “Table 1: Mean concentration of Cd, Co, Cr, & Fe in mgkg⁻¹ (dry weight) in the soil and vegetables during the rainy season in Obudu.” and “Table 2: Mean concentration of Cd, Co, Cr, & Fe in mgkg⁻¹ (dry weight) in the soil and vegetables during the dry season in Obudu.”</p> <p>Lines 167-168 and 170-171. Additionally the authors write that the sample are form Obudu area.</p> <p>Text of lines 96-113 is incorrectly formatted.</p> <p>Again the whole text of the manuscript is the same as the manuscript which has been published. Just the numbers are different.</p>
