PART 1: Review Comments

	Reviewer's comment	Author's comment *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	1. The number of rats per group is quite small (n = 6) for the quantitative analyses; blood and urine chemical tests. 2. You collected the rats' kidneys as mentioned in the section #2.3, thus your work would be more valuable if you present the histological findings in these rats' kidneys. 3. How did you collect the 24 hour urine sample from the rats? How did you measure the chemical concentrations in the rats' blood and urine; what reagents and analyzer were used?	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Are there ethical issues in this manuscript?	*(If yes, Kindly please write down the ethical issues here in details)*
