**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	<p>This research was conducted to determine the fungal pathogens responsible for post harvest losses of pineapple sold at Wudil and Yen lemo markets. A total of 391 isolates were counted during the study. There were isolated fungal pathogens belonging to <i>Aspergillus</i> species like <i>A. niger</i>, <i>A. fumigates</i>, <i>A. flavus</i>. <i>A. niger</i> had the highest frequency of occurrence of (50%). <i>A.flavus</i> was the second with (27%). And <i>A. fumigatus</i> had the least frequency of occurrence of (23%).</p> <p>The purpose of the paper is accomplished. The results are well presented and interpreted. The results could serve as a scientific base for the other determinations regarding to the quality of this vegetal material.</p> <p>The paper is written in according to the journal requirements.</p> <p>The last bibliographic indices should be standardized.</p>	
<b>Optional/General</b> comments		

As per the guideline of editorial office we have followed VANCOUVER reference style for our paper.
