General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1. Need to be sure of P value which consider to be statistically significant or not in biological studies 2. Need to cite source of information in your manuscript to uphold academic integrity 3. Ensure flow of information in your document 4. Ensure clarity/ practicability on methods used in your study especially on monitoring, counting and recording of colonies isolated 5. State what you used for mean separation test, post anova analysis and please show this as evidence of significant different as you have stated in your text 6. Some sections shows signs of copy and pasting from another study, where banana and watermelon were used instead of pineapples 7. The study show clearly it was in the market place, you need to connect this with field otherwise your statement on fields seems to be misplaced 8. What do you mean on "toxic chemicals from nutrients"? 9. You need to be consistent in referencing by using bracket eg (2018) or not. Further italicize the name of the journal 	
Minor REVISION comments	Above comments and other minor comments are indicated in the reviewed manuscript	
Optional/General comments
