PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>-The title should reflect the actual study conducted. I suggest, "Occurrence of fungal diseases of sesame in Region of Myanmar and their impact to sesame yield" as it was only fungal diseases that were empirically investigated.</p> <p>-The author should reconcile the actual number of fields visited in this study</p> <p>-</p> <p>There was no any detection of phytoplasma and virus detection in the M&M section, but the phyllody symptom was ascribed to the duo. I think it is not correct.</p> <p>-Hence, remove any ascription to phytoplasma and viruses to the disease symptoms observed in both M&M and discussion sections</p>	
Minor REVISION comments	-State the number of samples collected/field in order to understand the disease incidence	
Optional/General comments
