**SDI Review Form 1.6**

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<ul style="list-style-type: none"> <li>- The title of the article should be corrected to (<i>Control of some phytopatogenic fungi using clove essential oil (Syzygium aromaticum L.)</i>), because the article studied three types only of the phytopatogenic fungi not all the phytopatogenic fungi.</li> <li>-The article has low innovation because the same idea was used before (ex: reference no. 39, 47, 48,..) on the same fungus (<i>F. verticilloides</i>) and other fungi and with different oils</li> <li>- All the article language should be editing reviewed.</li> <li>- The Latin names of fungi and essential oils should be written in italic even at references</li> <li>- Reference no. (4) not found.</li> </ul>	
<b>Minor</b> REVISION comments	<ul style="list-style-type: none"> <li>- The reference no. 47 is not in English as it written it is in Portuguese.</li> <li>- Some references could not be found even when using the given link like: no. 8, 11, 13.</li> <li>- Reference no. 35 has not Vol. No. , issues no. or pages no.</li> <li>-Why the auother did not use the first program R Core Team 3.5.1 [32] or the second Past 3.12 program [33] in all the statistical analysis?</li> <li>There are too many programmes for Statistical analysis for example:</li> <li>*Microsoft Excel data analysis tool; it was used to calculate a significance of correlation (P-value). (ANOVA )</li> <li>*SPSS statistical software (SPSS for Windows v.11.5).</li> <li>* Mstate-c for Windows.</li> </ul>	
<b>Optional/General</b> comments	<ul style="list-style-type: none"> <li>- Follow the correction in the attatched word.</li> <li>- Is not 1 cm for disc is too much for 7.5 cm petridish.</li> <li>- Why the auother used BOD inestead of the normal incubator? knowing that, BOD used to provide low temperature in range of 20-25°C for the growth of fungus, and the fungal grow here at 27±2°C.</li> <li>- Some symbols on the figures should be clarify.</li> <li>- Why write English at the reference?</li> <li>It could be wrote when the source is not English like, Spanish, French, but the normal at references is to be English</li> </ul>	

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	

As per the guideline of editorial office we have followed VANCOUVER reference style for our paper.
